Most classes teach PE for an afternoon. Sessions are broken up into:

20 minutes warm up consisting of circuit training (this covers the NC objective of children engaging in sustained physical activity)

1 hour and 15 mins of a PE session working on a particular skill first and then applying into a competitive game. This time to include mini evaluations where children peer assess each other's performance. What has worked well/what can be done to make even better.

15-minute cool down activity where children have opportunity to talk about the parts of the body they have used/importance of exercise.

Swimming slots can change year on year, however all children will have had a term of swimming lessons by the end of their primary education.
